**Past performance cannot guarantee future results.** Returns greater than one year are annualized. Returns are expressed in U.S. dollars. Composite returns reflect the reinvestment of dividends and other earnings.

Composite and benchmark returns are presented net of non-reclaimable withholding taxes, if any. Gross-of-fees returns are presented before management and custodial fees but after all trading expenses. Net-of-fees returns reflect gross performance less investment management fees. Net-of-fees returns are calculated by deducting 1/12 of the highest tier of the standard fee schedule in effect for the period noted (the model fee). The composite model fee for each period is either the highest tier

of the current fee schedule or a higher value, whichever is required to ensure the model composite net-of-fee return is lower than or equal to the composite net-of-fee return calculated using actual fees. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. The firm's fees are available on request and may be found on Part 2A of its Form ADV.

\*2011 Returns are for the 4-month period from inception on 9.1.2011 through 12.31.2011

The Trivalent International Emerging Markets Equity Composite includes all fee paying, non-wrap discretionary portfolios of \$100,000 or more that are managed according to the Trivalent International Emerging Markets Equity strategy. The strategy focuses on foreign companies that are characterized by improving business momentum and attractive valuations. Prior to October 2012, the minimum size for inclusion in the composite was \$1 million. The composite creation date is September 2007 and the composite inception date is August 2007.

The benchmark of the composite is the MSCI Emerging Markets Small Cap Index (Net). Prior to 10/1/2017, the benchmark is the S&P® Emerging Plus Small Cap Index (Net). The MSCI Emerging Markets Small Cap Index (Net) includes small cap representation across 24 Emerging Markets countries. With 1,836 constituents, the index covers approximately 14% of the free float-adjusted market capitalization in each country. The small cap segment tends to capture more local economic and sector characteristics relative to larger Emerging Markets capitalization segments. The S&P® Emerging Plus Small Cap Index (Net) consists of the bottom 15% (based on market capitalization) of companies from each country represented in the S&P® Emerging BMI plus Korea. The S&P® Emerging BMI includes companies domiciled in 20 emerging markets countries with float-adjusted market capitalizations of at least US\$100 million and annual trading liquidity of at least US\$50 million.

All investments carry a certain degree of risk including the possible loss of principal, and an investment should be made with an understanding of the risks involved with owning a particular security or asset class.

Index returns are provided to represent the investment environment during the periods shown. Index performance does not reflect management fees, transaction costs or expenses that would be incurred with an investment. One cannot invest directly in an index. **Past performance does not guarantee future results.**
